Renewable Energy Research Internship, ICARE HUST China

ICARE Projects are all about clean and renewable energy development, we are constituted by various subjects and research orientations. 23 projects are available for Oxford students to take part in. We offer fundamental Research Positions for undergraduates and advanced Research Positions for Seniors, Masters students and DPhil candidates. We also offer a cultural exchange program as an optional extra at the start of the internship.

Renewable Energy Research Internship, Institute of Energy and Environment - University Of Sao Paulo, Brazil

GBIO, the Research Group in Bioenergy at the Institute of Energy and Environment (IEE), University of São Paulo, seeks two interns to contribute to its work on Biogas and Biomethane barriers and perspectives. The project's objective is to evaluate and discuss the potential for biogas and biomethane to complement the natural gas offer in Brazil, aiming to fulfil Brazilian targets under the Paris Agreement on Climate Change Conference. Interns will help to develop our research project under supervision and guidance from the team.

Food Poverty Internship, Good Food Oxford

The Food Power Intern will support the initial development of Good Food Oxford's work to set up a Food Access Alliance for Oxford, tasked with developing a Food Access Action Plan for Oxford.

Sustainability Consultancy Internship, Hoare Lea, Oxford

Hoare Lea are an award-winning engineering consultancy with a creative team of engineers, designers, and technical specialists. We provide innovative solutions to complex engineering and design challenges for buildings. The intern will assist on a variety of projects, across various sectors and stages, allowing you to develop an understanding of the sustainable design principles and their implementation both in early design stages and in the post construction/operation stages of buildings.

Sustainable Development Internship, AECOM, Abingdon

An opportunity for a masters student to work on novel social and environmental sustainability projects for leading clients with AECOM.
