Healthcare Research and Policy Internship, The Queen's Nursing Institute, London

The Queen's Nursing institute is a registered charity dedicated to improving the nursing care of people in their own homes. In November 2019, the QNI launched the International Community Nursing Observatory. In 2020, the ICNO is undertaking work in relation to understanding district nurses' workload. The intern will have the opportunity to participate in this research including undertaking a literature review, to support the policy development work of the Institute, to shadow a Queen's Nurse and to update the database of homeless health practitioners.

Reset Your Health, Mental and Physical Health Promotion Internship, RYG HEALTH, Oxfordshire

RYG aims to provide better mental and physical health through empowering people to take control of their diet and improve their gut health. You would be a central part of our team as we work on our product, refine our marketing strategy and apply for grants to enable us to move our business in to its next stage.

NHS Culture and Diversity Champion Internship, NHS - Barking, Havering and Redbrige University Hospitals Trust, London

An opportunity to make a real difference within NHS Hospitals. Working with the People and Organisational Development Business Partners, you will be involved in facilitating sustainable culture change and improving equality, diversity and inclusion.

Patient Experience Research Internship, Horatio's Garden Charity, Salisbury

Horatio's Garden is a national charity which creates and cares for beautiful gardens in NHS spinal injury centre. The internship will be an opportunity to work closely with this small growing charity collating and analysing patient outcomes of the different garden projects.

3D Biomedical Engineering And Modelling Internship, 3D LifePrints, Oxfordshire

At 3D LifePrints, we pride ourselves on our innovative use of 3D technologies to improve patient lives all across the world. Join one of the UK's leading medical 3D printing organisations and be involved in a range of challenging and innovative projects developing 3D medical products and services for the NHS. The successful applicant for the internship will work on a variety of exciting and challenging projects and be involved in the workflow from start to finish.
European Thought Leadership Internship (Pharma/BioTech), IQVIA, London

The individuals who join us can expect to get an excellent grounding across a wide range of issues in the pharmaceutical industry, with an international perspective. They will gain experience using IQVIA MIDAS and other data and information resources, and will extend their presentation creation and writing skills. They may also have the opportunity to participate in meetings with clients and even present themselves, either internally or externally, on a specific project that will be allocated to them. They will also get the opportunity to meet people from a wide range of IQVIA businesses and functions, potentially including Consulting, Clinical development, Technology, Market Access, Real world Evidence, and others, which could provide useful insight into a wide range of potential careers in the pharmaceutical industry. The projects planned for the summer are yet to be determined, but previous interns have done projects on:- mapping the landscape of genomics initiatives across the world- addressing the sales coverage of orphan medicines- looking at the approvals of oncologicals by the EMA by the nature of the data accepted for approval- Understanding the implications of BREXIT for the life sciences sector.

Technology/Research and Development Internship, Albus Health, Oxford

Depending on your skills and background, you will be working with the technology and clinical team at Albus to identify inefficiencies in specific projects and implement robust and scalable solutions to manage them. If your training and experience is suitable, you might also work on an R&D project related to company's core technology. Please see opportunity summary for more details.

Quadram Institute Bioscience, Pharmaceutical Research Internship, Quadram Institute Bioscience, Norwich

This student project will examine the use of an exciting new technology, benchtop NMR spectroscopy, as a potential tool for QA/QC in the pharma sector. The student will prepare samples that simulate medicines (actives and excipients) for analysis, acquire spectra, and use a database to identify and quantify the ingredients.
